

Low Carbon Futures

Low Carbon Futures is all about **helping people to reduce their carbon footprint** and as a result, impact on the environment.

We want you to help you look at improving what you currently do with your food, waste and consumables. We have helpful information and advice, tailored to the Waveney area, to help you **reduce, reuse, recycle** and **compost**.

Climate change is real and happening now. It is caused by greenhouse gases that are heating up the planet, melting the ice caps and changing the weather. The sea levels are rising, we are seeing more severe flooding and crop failures. **If we act now and reduce our carbon emissions then we can make the future a better place**, if we do nothing the future will be grim, and this could happen in your lifetime.

Here at Bright Green we have created a **number of different actions that you can pledge to take at home**. They vary from recycling your glass to composting at home and our Low Carbon Futures team will be on hand to help you achieve the actions.

Materials	I WILL.....	I'll do it!	I already do it!	No thanks!
Paper and Card	Recycle as much paper and card as possible			
	Compost any shredded paper			
	Buy recycled paper where possible			
	Reuse paper			
	Register for free to stop junk mail			

So what are you waiting for - get involved!

Address: 12 Grove Road, Lowestoft, Suffolk. NR32 1EB.

Who we are!

Bright Green is an **environmental social enterprise**, a not-for-profit organization with community benefits. Bright Green works at a local level with communities, businesses and other organizations to **raise awareness of environmental issues** and to **take action to reduce our environmental impact**. Bright Green has a growing portfolio of projects and provides a range of consultancy services.

climate change | sustainable buildings | carbon footprint | recycling & resource efficiency | renewable energy | EMS

We also run a number of free services including:

Eastex Suffolk Materials Exchange

Eastex is a free online service for businesses, organisations and schools to help keep reuseable items in circulation and out of landfill. If you need resources or have some to pass on then visit www.eastex.org.uk/suffolk

Grow your own & reduce your fuel bills!

We can help you to reduce your fuel bills by finding the right energy tariff, accessing grants to insulate your homes and lending out energy monitors so you can see how much electricity you are using and how do reduce it.

We are also providing home growing starter kits, seeds, planters and compost so you can start your own mini allotment at home. Interested? Call the office.

Master Composters

Master Composters are volunteers who encourage people in their local community to start composting at home, and offer support to people who are already home composting and may be having difficulties or need encouragement. We have over 10 of them so get in touch!
